- Weeds: Get rid of the really bad guys

It’s no miracle . . . It’s Turf Love
Turf Love in 2007 for Homeowners

- Homeowners learned to have a healthy lawn and protect water quality
- Site assessment: will lawn grow here?
- Fertilizer recommendations: a zero-sum game for phosphorus / adjust N for weed control
- Heavy over-seeding and re-seeding
- Mowing: Sharpen your blades!
- Homeowners said: “Where can I buy these products?”

It’s no miracle . . . It’s Turf Love
Turf Love 2008 for Homeowners

Spring workshop:

- Homeowners will bring us samples of their lawns and photos
- We’ll do pH testing, off-site site assessment, weed ID and make a few recommendations
- Teach IPM principles

It’s no miracle . . . It’s Turf Love
What’s Our Pitch to D-I-Y Homeowners?

- Mow high
- Sharpen mower blades
- Water wisely
- Use the best grass seed
- Use fertilizer only as needed
- Identify your weeds

Result? Less work, Healthy lawn, clean water

How Can You Benefit?

It’s old news – your clients need you for education

• The “green carpet” lawn is advertised everywhere
• Ads for grub control run in June – the wrong time of year to control grubs
• A 1995 Illinois retailer survey indicated only 34% provided any training on pesticides sold in their stores.

*It’s no miracle . . . It’s Turf Love*
Your clients need you for education

- Lawns are reflections of self-worth
- People are confused about what “organic” really means
- IPM practices are cheaper over the long term than automatic pesticides

It’s no miracle . . . It’s Turf Love
What’s Your Biggest Obstacle to Selling IPM for Lawns?

• Lack of qualified help: part-time, short-term, seasonal, untrained
• Customers’ desire for a quick fix
• Customers are looking for low prices
• *(Additional excuses – reasons - here)*

*It’s no miracle . . . It’s Turf Love*
What if you could add profit with IPM?

- Site Assessment:
  - Is Turf Working Here?
  - Would Groundcovers be Better?
- Pest Threshold Education
- Saturday Extension Q & A Panel
- Soil Test / Compaction Analysis

*It’s no miracle . . . It’s Turf Love*
Sharpen Those Mower Blades

Quick quiz:
The most lawn-conscious homeowners sharpen their blades:

• Once a year
• Twice a year
• Every month

It’s no miracle... It’s Turf Love
You know the answer . . . Never!

It's no miracle . . . It's Turf Love
How Much Water?

- One inch a week is all the lawn needs
- Use the tuna can method
- Water early in the day

*It’s no miracle . . . It’s Turf Love*
Use only as much fertilizer as needed

- How often do homeowners get their soil tested? **Hint: Never!**
- How often do you test your clients’ soils?

*It’s no miracle . . . It’s Turf Love*
Identify pest and disease thresholds

• How many white grubs before panic sets in?
• What do you do about mid-season fungus?
• When do you control crabgrass?

It’s no miracle . . . It’s Turf Love
Select the right seed for the site

Cheap seed = cheap lawn

*It’s no miracle . . . It’s Turf Love*
What can you do?

- Stock zero-phosphorous fertilizers and be able to explain how to use them
- **Explain the tuna-can watering method**
- Explain how to select grass seed for specific landscape needs
- **Use the counter display unit we can provide**

*It’s no miracle . . . It’s Turf Love*
Profit from our Homeowner Turf Love Messages

You do the rest:

• Sell them good fertilizer, quality seed, environmentally sound weed control, organic or least-toxic insect control
• Sharpen their mower blades?
